

WORLD TRADE ORGANIZATION

English only

**Supporting Tables Relating to Commitments on Agricultural Products
in Part IV of the Schedules**

This document contains supporting material relating to commitments on agricultural products contained in Schedule XXXVIII - Japan.

Anglais seulement

**Tableaux explicatifs concernant les engagements relatifs aux
produits agricoles repris dans la Partie IV des Listes**

Le présent document contient les données explicatives concernant les engagements relatifs aux produits agricoles inscrits dans la Liste XXXVIII - Japon.

Solamente inglés

**Cuadros justificantes relativos a los compromisos sobre productos
agropecuarios consignados en la Parte IV de las Listas**

En el presente documento figura la documentación justificante relativa a los compromisos sobre productos agropecuarios consignados en la Lista XXXVIII - Japón.

Notes for Supporting Document AGST/JPN

1. GATT Document AGST/JPN has been provided only to facilitate interpretation and verification of the Japan's Draft Final Schedule of agricultural concessions and commitments. The document and its contents do not form any part of Japan's Draft Final Schedule of such concessions and commitments.

2. While care has been taken in the preparation of the contents of AGST/JPN, this document may inadvertently contain technical errors, misprints and/or omissions. Japan therefore reserves the right to make amendments and/or corrections to AGST/JPN to rectify any errors, misprints or omissions.

DOMESTIC SUPPORT: UNITED STATES OF AMERICA

Aggregate Measures of Support: Other Product Specific Support and Total AMS

Description of basic products	Measure type	Source and Comments
1	2	3
Cotton	<p>Storage subsidy</p> <p>Commodity loan interest</p> <p>Fees and levies</p>	<p>In addition to interest subsidies on CCC cotton loans, the CCC also paid some producer storage costs for the 1986 and 1987 crops. This was to help make the cotton under loan available to the market at the prevailing world price. Fiscal year outlays were used to measure the amount of the benefit.</p> <p>Sources: Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, personal communications</p> <p>Same general method as discussed above for barley. Special provisions for cotton interest subsidies to producers were implemented to help assure that cotton under loan would become available to the market at the prevailing world price.</p> <p>Loan placement fees were deducted from the cotton AMS. Other fees and levies were reported by the CCC, but were not deducted for reasons listed below.</p> <p>Cotton check off assessments per bale are collected by the CCC from producers to fund research and promotion, activities not related to the price and income support programs.</p> <p>Loan placement fees are collected at the time of the original CCC loan to cover administrative costs of making the loans. These were deducted from the AMS because they partially off set program administration costs.</p> <p>Cotton producers also pay a cotton classification fee at the gin for the grading and inspection of samples from each bale by the Agricultural Marketing Service--an effective cost of marketing which should not be deducted from other cotton program benefits. Reductions in program benefits due to the Grumm Rudman Hollins law are already reflected in the level of loans and payments, so no further deduction is needed.</p> <p>Sources: Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, personal communications</p>

(*1) Reduction commitment is not required because the total AMS is not more than 5 % of the value of production ("de minimis" clause).

$$\frac{[\text{total AMS}]}{[\text{total production}]} = \frac{1.3(\text{average in 1986-88})}{440.6(\text{average in 1986-88})} = 0.3\%$$

Source : MAFF "Statistics of agricultural income produced"

(*2) Reduction commitment is not required because the total AMS is not more than 5 % of the value of production ("de minimis" clause).

$$\frac{[\text{total AMS}]}{[\text{total production}]} = \frac{13.8(1986, \text{ taking into account the credit since 1986})}{2,168.4(\text{average in 1986-88})} = 0.6\%$$

Source : MAFF "Statistics of agricultural income produced"

(*3) Reduction commitment is not required because the total AMS is not more than 5 % of the value of production ("de minimis" clause).

$$\frac{[\text{total AMS}]}{[\text{total production}]} = \frac{7.8(\text{average in 1986-88})}{822.8(\text{average in 1986-88})} = 0.9\%$$
