## RECTIFICATIONS AND MODIFICATIONS OF SCHEDULES

### Schedule LXXIX - Thailand

#### Addendum

The following communication, dated 22 October 1997, has been received from the Permanent Mission of Thailand.

With reference to Thailand's submission of the schedule of concessions for Information Technology Products modifying Schedule LXXIX as appeared in G/MA/TAR/RS/34 (28 July 1997), we have discovered that there are some minor technical corrections to be made to a list of HS headings corresponding to products specified in Attachment B. It would be greatly appreciated if this can be incorporated into the initial notification and circulated to the WTO Members.

If no objection is notified to the Secretariat within three months from the date of this document, the rectifications and modifications to Schedule LXXIX - Thailand will be deemed to be approved and will be formally certified.

Copies of the revised pages are available in electronic form (MS Access) from the Documents Dissemination Facility (DDF) under "Market Access Schedules--Rectifications & Modifications". It is also available in paper form from the Market Access Division (Ms. Wood, Office 3142, tel: 739 50 79).

DescriptionHS

Computers: automatic data processing machines capable of 1) storing the processing program or programs and at least the data immediately necessary for the execution of the program; 2) being freely programmed in accordance with the requirements of the user; 3) performing arithmetical computations specified by the user; and 4) executing, without human intervention, a processing program which requires them to modify their execution, by logical decision during the processing run. The agreement covers such automatic data processing machines whether or not they are able to receive and process with the assistance of central processing unit telephony signals, television signals, or other analogue or digitally processed audio or video signals. Machines performing a specific function other than data processing, or incorporating or working in conjunction with an automatic data processing machine, and not otherwise specified under Attachment A or B, are not covered by this agreement.	847110,847130,847141,847149
Electric amplifiers when used as repeaters in line telephony products falling within this agreement, and parts thereof	851750
Flat panel display devices (including LCD, Electro Luminescence, Plasma, Vacuum-Fluorescence and other technologies) for products falling within this agreement, and parts thereof.	853120
Network equipment: Local Area Network (LAN) and Wide Area Network (WAN) apparatus, including those products dedicated for use solely or principally to permit the interconnection of automatic data processing machines and units thereof for a network that is used primarily for the sharing of resources such as central processor units, data storage devices and input or output units - including adapters, hubs, in-line repeaters, converters, concentrators, bridges and routers, and printed circuit assemblies for physical incorporation into automatic data processing machines and units thereof.	847150
Monitors : display units of automatic data processing machines with a cathode ray tube with a dot screen pitch smaller than 0,4 mm not capable of receiving and processing television signals or other analogue or digitally processed audio or video signals without assistance of a central processing unit of a computer as defined in this agreement. The agreement does not, therefore, cover televisions, including high definition televisions.	847160
Optical disc storage units, for automatic data processing machines (including CD drives and DVD-drives), whether or not having the capability of writing/recording as well as reading, whether or not in their own housings.	847170
Paging alert devices, and parts thereof.	ex852790
Plotters whether input or output units of HS heading No 8471 or drawing or drafting machines of HS heading No 9017.	847150

Description	HS
Printed Circuit Assemblies for products falling within this agreement, including such assemblies for external connections such as cards that conform to the PCMCIA standard. Such printed circuit assemblies consist of one or more printed circuits of heading 8534 with one or more active elements assembled thereon, with or without passive elements "Active elements" means diodes, transistors, and similar semiconductor devices, whether or not photosensitive, of heading 8541, and integrated circuits and micro assemblies of heading 8542.	8534
Projection type flat panel display units used with automatic data processing machines which can display digital information generated by the central processing unit.	847160
Proprietary format storage devices including media therefor for automatic data processing machines, with or without removable media and whether magnetic, optical or other technology, including Bernoulli Box, Syquest, or Zipdrive cartridge storage units.	847170
Multimedia upgrade kits for automatic data processing machines, and units thereof, put up for retail sale, consisting of, at least, speakers and/or microphones as well as a printed circuit assembly that enables the ADP machines and units thereof to process audio signals (sound cards).	847330
Set top boxes which have a communication function: a microprocessor-based device incorporating a modem for gaining access to the Internet, and having a function of interactive information exchange	851750
